

PROPELLER LOGBOOK

FAA LOGBOOK REGULATIONS

91.173 Maintenance Records

A. Except for work performed in accordance with 91.170, each registered owner or operator shall keep the following records for the periods specified in paragraph (b) of this section:

(1) Records of maintenance and alteration, and records of the 100-hour, annual, progressive, and other required or approved inspections, as appropriate, for each aircraft (including the airframe) and each engine, propeller, rotor, and appliance of an aircraft. The records include:

- (i) A description (or reference to data acceptable to the Administrator of the work performed;
- (ii) The date of completion of the work performed;
- (iii) The signature and certificate number of the person approving the aircraft for return to service.

(2) Records containing the following information:

- (i) The total time in service of the airframe.
- (ii) The current status of life-limited parts of each airframe, engine, propeller, rotor, and appliance.
- (iii) The time since last overhaul of all items installed on the aircraft which are required to be overhauled on a specified time basis.

(iv) The identification of the current inspection status of the aircraft, including the times since the last inspections required by the inspection program under which the aircraft and its appliances are maintained.

(v) The current status of applicable airworthiness directives, including the method of compliance.

(vi) A list of current major alterations to each airframe engine, propeller, rotor, and appliance.

B. The owner or operator shall retain the records required to be kept by this section for the following periods.

(1) The records specified in paragraph (a) (1) of this section shall be retained until the work is repeated or superseded by other work or for one year after the work is performed.

(2) The records specified in paragraph (a) (2) of this section shall be retained and transferred with the aircraft at the time the aircraft is sold.

C. The owner or operator shall make all maintenance records required to be kept by this section available for inspection by the Administration or any authorized representative of the National Transportation Safety Board (NTSB).

Limited Warranty

Standard Rate Overhauls and Reseals: All propellers and governors that are "Newly Overhauled" by Johnson Propeller Service (JPI) will carry a Limited Warranty, to be free of defects in materials replaced and workmanship for 300 hours or 6 months from the time of overhaul, whichever comes first, propellers that are between 300 hours and 1000 hours or/and are under 12 months since overhaul will be honored but owner is responsible for cost of parts. The sole obligation of JPS herein is to repair or replace, at its option, any item(s) found to be defective. Any defective item in question must be returned with transportation charges prepaid to JPS. In no event, shall JPS be liable for incident and/or consequential damages including loss of income or profits, loss of time, lost sales or economic loss. This Limited Warranty does not include crankshaft leakage, damage due to object strike, excessive blade wear due to aircraft operation, sludge, or de-icer heater damage. Propeller/governor must have been maintained in accordance with manufacturer's recommendations in order for this warranty to remain valid. This warranty does not include removal and reinstallation of the propeller or governor. This warranty is transferable, only if the original Work Order and FAA Form 8130-3 are transferred with the propeller or governor. **NO EXCEPTIONS.**

NOTE- Regulations are subject to revision at any date without notice.

User/Installer Responsibilities						
It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article. Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1. Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.
